

Wine Cabinetry Care Instructions

Furniture made of wood requires proper care to maintain its finish and remain in good conditions.

- Dust wooden furniture regularly with a clean, soft, cotton cloth.
- Use minimal water to clean wooden items. Water can stain finishes and swelling or warping of the wood can occur.
- Keep sharp or pointed items away from the furniture to avoid scratches.
- Humidity levels should be kept consistent to avoid expansion and contraction of the wood.
- Harsh chemicals should not be used to clean wooden furniture. Using chemicals can damage the finish and cause color differences in the wood.
